

Table of Contents

TABLE OF EXHIBITS	7
Chapter One	7
Chapter Two	7
Chapter Three	7
Chapter Four	8
Appendix	17
Executive Summary	20
CHAPTER 1	27
INTRODUCTION AND METHODOLOGY	27
Report Scope	27
Scope of Data Analysis	27
Thematic Scope	28
Geographical Scope	31
Methodology	31
Procurement	32
Calculation of CAGR	32
The Nanoscale	33
Two biological examples that illustrate nanoscale:	34
CHAPTER 2	36
INTRODUCTION TO NANOTECHNOLOGY & MEDICINE - OVERVIEW OF NANOTECHNOLOGY	36
Why is Nanotechnology A Critical Application for Medicine and Biomedicine?	36
Why Nanotechnology Is Needed for Medicine and Biomedicine?	38
WHAT ARE THE KEY DRIVERS FOR ADOPTION OF NANOTECHNOLOGY IN MEDICINE AND BIOMEDICINE?	41
The Aim Of Targeting For Detection, Quantification And Characterization Purposes –	
Molecular Recognition in Nanotechnology in Medical And Biomedical Diagnostics	41
Reasons Why The Market of Nanotechnology in Medical And Biomedical Diagnostics	
Expanded so Rapidly During The 2000-2010 Decade	45
Market Drivers For Nanotechnology-Based Medical And Biomedical Diagnostics	46
Reasons Why The Market of Nanotechnology in Medical And Biomedical Diagnostics Will	
Rapidly Expand	46
Drivers For Synergies Between Nanotechnology in Medical And Biomedical Diagnostics	
And Nanotechnology in Drug Delivery	47
Increasing Proportion of The Ageing Population	47
Demand For More Affordable Health Care	49
Public Health – Ending disease	49
Demand For More Innovation	49
Social Responsibility	49
THE MOST IMPORTANT FIELDS IN THE ADOPTION OF NANOTECHNOLOGY IN MEDICINE AND BIOMEDICINE	50
Nanotechnology in Drug Delivery	51

Nanotechnology in Medical and Biomedical Diagnostics	52
Nanotechnology in Regenerative Medicine and Tissue Engineering	52
Other Applications For Nanomaterials In The Medical And Pharmaceutical Sector	52
HOW NANOTECHNOLOGY IS ALREADY HAVING AN IMPACT IN MEDICAL AND BIOMEDICAL DIAGNOSTICS	53
Case Study 1 – Diagnosis of head-and-neck cancer from exhaled breath	53
Case Study 2 – UTSA researchers embracing nanotechnology to accelerate diagnostics	54
Case Study 3 – Biocompatible graphene transistor array reads and records action potentials from electrogenic cells	54
CHAPTER 3	59
KEY BARRIERS TO THE ADOPTION OF NANOTECHNOLOGY IN MEDICINE AND BIOMEDICINE	59
Nanotoxicity Nanopollution and Nanosafety	59
Ethical Considerations of Nanotherapies	61
Delayed Nanoregulation	62
CURRENT & FUTURE CHALLENGES IN THE ADOPTION OF NANOTECHNOLOGY IN MEDICINE AND BIOMEDICINE	65
Current & Future Challenges of Nanosafety And Risk Management	66
Current & Future Challenges of Nanoregulation	68
Current & Future Challenges of Nanomedicine Industry	70
Current & Future Challenges of Sustained Innovation	71
Current & Future Challenges of Cooperation	71
TAM ANALYSIS, WITHOUT SEGMENTATION (2000-2010)	72
TAM FORECAST , WITHOUT SEGMENTATION (2011-2021)	75
CHAPTER 4	80
OVERVIEW OF THE KEY NANOTECHNOLOGIES USED IN MEDICAL AND BIOMEDICAL DIAGNOSTICS SORTED BY APPLICATIONS	80
Nanotechnology in Medical and Biomedical Diagnostics: Diagnostics Nanotechnologies	81
Quantum Dots	83
Preparing Quantum Dots	84
Operation of Quantum Dots	84
Detection of Quantum Dots	85
Features And Benefits of Quantum Dots	85
Disadvantages of Quantum Dots	87
Application of Quantum Dots to Medical And Biomedical Nanotechnology-Based Diagnostics Assays	89
Prostate-specific antigen assay	90
Acetylcholine assay	90
Targeting of membrane protein P-glycoprotein (Pgp) in HeLa cells that had been transiently transfected by a plasmid encoding for Pgp	91
Cellular organelles assay	91
Cancer detection assay	91
Imaging assays	92
Gold Nanoparticles	92
Application of Gold nanoparticles to Medical And Biomedical Diagnostics Assays	93
PSA assay	93
Alzheimer’s disease BCA	94
BCA as a possible alternative for PCR	95
Cantilevers	95
Application of Cantilevers to Medical And Biomedical Diagnostics Assays	96
Exosomes	98
	5

Microvesicles Overview	98
Microvesicles as Mediators of Intercellular Communication	98
Types of Released Microvesicles	99
Intracellular Origin of Exosomes	99
Exosomes as Nanotechnology in medical and biomedical diagnostics Biomarkers	100
Nanobiosensors	100
Medical and Biomedical Imaging	102
Fluorescent Nanoparticles	102
<i>In vivo</i> nanoparticle-based near-infrared fluorescence (NIRF) imaging techniques	103
Nanobioimaging	104
Nanotechnology-Based Medical Devices For Diagnostic	104
Nanopatterned Medical Devices for Diagnostic	107
Nanoporous Silica Nanochips	107
Nanowire Biosensors	109
Micro- And Nanocantilever Arrays	111
Molecularly Gated Single Electron Transistors	112
The Most Relevant Technologies in The Key Area of Nanotechnology in Medical And Biomedical Diagnostics	114
STAGE OF DEVELOPMENT OF KEY NANOTECHNOLOGIES USED IN MEDICAL AND BIOMEDICAL DIAGNOSTICS	114
Genomics and Proteomics in Nanotechnology in Medical and Biomedical Diagnosis in a Context of Personalized Medicine	114
The Potential of The Adoption of Nanotechnology to Medical And Biomedical Diagnostics	115
TAM ANALYSIS, WITH SEGMENTATION (2000-2010)	118
TAM by Country	118
TAM by Key Technology	138
TECHNOLOGY ADOPTION ROADMAP	161
Projected Product Pipeline For Nanotechnology-Based Medical and Biomedical Diagnostics Market	161
Projected Product Pipeline For Nanotechnology-Based Medical Devices For Medical And Biomedical Diagnostics	162
Projected Product Pipeline For Nanotechnology-Based Medical Devices For Theranostics	162
Projected Product Pipeline For Nanotechnology-Based Medical Imaging For Medical And Biomedical Diagnostics	163
TAM FORECAST, WITH SEGMENTATION (2011- 2021)	164
TAM Forecast by Country	164
TAM forecast by Key Technology	189
SWOT ANALYSIS (2011-2021 PERIOD)	213
APPENDIX	216
Publishing activity by organization (2000-2010)	216
