
TABLE OF EXHIBITS

CHAPTER ONE

Exhibit 1.1

Formula for the calculation of the Compound Annual Growth Rate (CAGR) [2].

Exhibit 1.2

Formula for the verification of the calculated values of CAGR (2011-2021) [2].

Exhibit 1.3

Metres in a nanometre (top), nanometres in a metre (bottom)

CHAPTER TWO

Exhibit 2.1

Illustration of the fact that the periodic table of elements, as we know it (at meter scale) governed by classic Newtonian laws of physics. However, when perceived at nanoscale, those elements are governed by the laws of quantum physics.

Exhibit 2.2

Proportion of the population aged over 65 and over 80 [8].

CHAPTER THREE

Exhibit 3.1

Key barriers to the adoption of nanotechnology in medicine and biomedicine (Source: Cientifica, Ltd.).

Exhibit 3.2

Specified expected barriers in the development of particular types of nanoparticles (Courtesy of CienNanoroadmap Synthesis Report), [6].

Exhibit 3.3

Table representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, without segmentation, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 3.4

Line chart representing Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, without segmentation, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 3.5

Bar chart representing Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, without segmentation, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 3.6

Table representing the Total Addressable Market, TAM forecast to 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, without segmentation, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 3.7

Line chart representing the Total Addressable Market, TAM forecast to 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, without segmentation, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 3.8

Bar chart representing the Total Addressable Market, TAM forecast to 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, without segmentation, source: Cientifica (all figures US\$ Million Dollars).

CHAPTER FOUR

Exhibit 4.1

Summarized comparison of characteristics of quantum dots (QDs), cantilevers and gold nanoparticles in the scope of the adoption of nanotechnology to clinical diagnosis [3].

Exhibit 4.2

Schematic diagram representing the general structure of a Quantum dot (in this case, a typical CdSe/ZnS QD). The coating extremities can change according to requirements regarding application and biocompatibility (e.g. mercaptoacetic acid or streptavidin) [3].

Exhibit 4.3

A schematic diagram of a multiplex QD-based assay. Multiple antigens (Ag) can be labelled through the use of primary antibodies (Ab) conjugated to QDs with different sizes. One antibody may be biotinylated and detected with a streptavidin-coated QD. On excitation, QDs will have different emission maxima based on their sizes [3].

Exhibit 4.4

A summary of toxicity breakthroughs standing on selected quantum dots studies [3].

Exhibit 4.5

Selected examples of quantum dots-based assays. The presented quantum dots have different recognition moieties [3].

Exhibit 4.6

Examples of the adoption of nanotechnology to medical and biomedical diagnosis and a summary of the characteristics of those technologies [3].

Exhibit 4.7

Schematic representation of production and release of exosomes. The exocytic multivesicular bodies may fuse with membrane and release exosomes [4].

Exhibit 4.8

Table representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, all countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.9

3-D pie chart representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, by world regions and countries, source: Cientifica (all figures in percentage).

Exhibit 4.10

Horizontal bar graph representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, by world regions and countries, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.11

Line chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, by world regions and countries, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.12

3-D stacked vertical bar graph representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, by world regions and countries, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.13

3-D stacked area chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, by world regions and countries, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.14

3-D pie chart representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, all world regions and countries studied, source: Cientifica (all figures in percentage).

Exhibit 4.15

Horizontal bar graph representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, all world regions and countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.16

3-D pie chart representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures in percentage).

Exhibit 4.17

Horizontal bar graph representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.18

Line chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.19

3-D stacked vertical bar graph representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.20

3-D stacked area chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.21

3-D pie chart representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures in percentage).

Exhibit 4.22

Horizontal bar graph representing the Total Addressable Market, TAM In 2010, for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.23

Line chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.24

3-D stacked vertical bar graph representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.25

3-D stacked area chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.26

Table representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, all most relevant key technologies, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.27

3-D pie chart representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures in percentage).

Exhibit 4.28

Horizontal bar graph representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.29

Line chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.30

3-D stacked vertical bar graph representing the Total Addressable Market, TAM (2000-2010) , for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.31

3-D stacked area chart representing the Total Addressable Market, TAM (2000-2010) , for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.32

3-D pie chart representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures in percentage).

Exhibit 4.33

Horizontal bar graph representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.34

Line chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.35

3-D stacked vertical bar graph representing the Total Addressable Market, TAM (2000-2010) , for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.36

3-D stacked area chart representing the Total Addressable Market, TAM (2000-2010) , for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.37

3-D pie chart representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures in percentage).

Exhibit 4.38

Horizontal bar graph representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.39

Line chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.40

3-D stacked vertical bar graph representing the Total Addressable Market, TAM (2000-2010) , for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.41

3-D stacked area chart representing the Total Addressable Market, TAM (2000-2010) , for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.42

3-D pie chart representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures in percentage).

Exhibit 4.43

Horizontal bar graph representing the Total Addressable Market, TAM in 2010, for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.44

Line chart representing the Total Addressable Market, TAM (2000-2010), for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.45

3-D stacked vertical bar graph representing the Total Addressable Market, TAM (2000-2010) , for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.46

3-D stacked area chart representing the Total Addressable Market, TAM (2000-2010) , for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.47

Table representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, by world regions / countries, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.48

3-D pie chart representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, by world regions, source: Cientifica (all figures in percentage).

Exhibit 4.49

Horizontal bar graph representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, by world regions, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.50

Line chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, by world regions, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.51

3-D stacked vertical bar graph representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, by world regions, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.52

3-D stacked area chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, by world regions, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.53

3-D pie chart representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, by all world regions / countries studied, source: Cientifica (all figures in percentage).

Exhibit 4.54

Horizontal bar graph representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, by all world regions / countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.55

Line chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, by all world regions / countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.56

3-D stacked vertical bar graph representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, by all world regions / countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.57

3-D stacked area chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, by all world regions / countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.58

3-D pie chart representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures in percentage).

Exhibit 4.59

Horizontal bar graph representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.60

Line chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.61

3-D stacked vertical bar graph representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.62

3-D stacked area chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, European Union countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.63

3-D pie chart representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures in percentage).

Exhibit 4.64

Horizontal bar graph representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.65

Line chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.66

3-D stacked vertical bar graph representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.67

3-D stacked area chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, Asian countries studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.68

Table representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, all most relevant key technologies, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.69

3-D pie chart representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures in percentage).

Exhibit 4.70

Horizontal bar graph representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures in percentage).

Exhibit 4.71

Line chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.72

3-D stacked vertical bar graph representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.73

3-D stacked area chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, all key technologies studied, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.74

3-D pie chart representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures in percentage).

Exhibit 4.75

Horizontal bar graph representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.76

Line chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.77

3-D stacked vertical bar graph representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.78

3-D stacked area chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, technological approaches as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.79

3-D pie chart representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures in percentage).

Exhibit 4.80

Horizontal bar graph representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.81

Line chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.82

3-D stacked vertical bar graph representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.83

3-D stacked area chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, technological applications as a whole, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.84

3-D pie chart representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures in percentage).

Exhibit 4.85

Horizontal bar graph representing the Total Addressable Market, TAM forecast in 2021, for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.86

Line chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.87

3-D stacked vertical bar graph representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.88

3-D stacked area chart representing the Total Addressable Market, TAM forecast by 2021 (for the 2011-2021 period), for nanotechnology in medical and biomedical diagnostics, impact of early disease detection, source: Cientifica (all figures US\$ Million Dollars).

Exhibit 4.89

SWOT analysis to evaluate the strengths, weaknesses, opportunities and threats involved in nanotechnology in medical and biomedical diagnostics, in the scope of the technology adoption roadmap (during the 2011-2021 period).

APPENDIX

Exhibit A.1

Table of the top 20 organizations showing the highest publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. World Region: North America; country: USA.

Organizations are ordered first by descending order of total articles published and then ordered alphabetically (increasing order), if applicable.

Exhibit A.2

Table of the top 20 organizations showing the highest publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. World Region: European Union; country: Germany.

Organizations are ordered first by descending order of total articles published and then ordered alphabetically (increasing order), if applicable.

Exhibit A.3

Table of the top 20 organizations showing the highest publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. World Region: European Union; country: France.

Organizations are ordered first by descending order of total articles published and then ordered alphabetically (increasing order), if applicable.

Exhibit A.4

Table of the top 20 organizations showing the highest publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. World Region: European Union; country: UK.

Exhibit A.5

Table of the organizations with publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. Country: Russian Federation. Organizations are ordered alphabetically (increasing order).

Exhibit A.6

Table of the top 20 organizations showing the highest publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. World Region: Asia; country: India.

Organizations are ordered first by descending order of total articles published and then ordered alphabetically (increasing order), if applicable.

Exhibit A.7

Table of the top 20 organizations showing the highest publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. World Region: Asia; country: India.

Organizations are ordered first by descending order of total articles published and then ordered alphabetically (increasing order), if applicable.

Exhibit A.8

Table of the top 20 organizations showing the highest publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. World Region: Asia; country: Japan.

Organizations are ordered first by descending order of total articles published and then ordered alphabetically (increasing order), if applicable.

Exhibit A.9

Table of the top 20 organizations showing the highest publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. World Region: Asia; country: P R China.

Organizations are ordered first by descending order of total articles published and then ordered alphabetically (increasing order), if applicable.

Exhibit A.10

Table of the top 20 organizations showing the highest publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. World Region: Asia; country: South Korea (Republic of Korea).

Organizations are ordered first by descending order of total articles published and then ordered alphabetically (increasing order), if applicable.

Exhibit A.11

Table of the organizations with publishing activity in PubMed periodicals (2000-2010), based on PubMed, for Nanotechnology in Drug Delivery. Asia; country: Taiwan.
